Abstract of Disclosure

10 A method, computer program product, and system that include identifying a  
sector offset on a storage device and storing an image onto the storage device at  
the sector offset where the image includes an operating system. The method also  
includes providing the sector offset to an installation engine and, subsequent to  
storing the image on the storage device, initiating the installation engine to cause  
the operating system to be installed on the storage device using the image.
